

(A) Zebrafish embryo development time course (hours post fertilization)

Timepoints: [18, 24]

Timepoints: [24, 30]

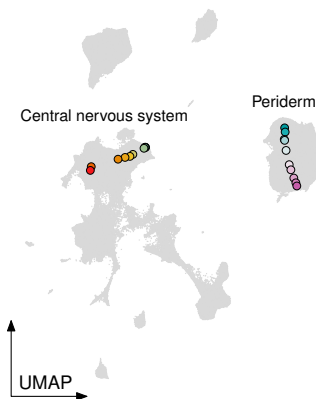

Timepoints: [30, 36]

Timepoints: [36, 42]

Timepoints: [42, 48]

(B) Synthetic cells projected on UMAP

(C) Predicted interactions between time and coordinates in latent space
